

SnapsHOT™: TDT - Architectural Solutions

Enterprise architected solutions, based on Open Source SOA and Virtual Services frameworks, offers today's Business and IT organizations significant increases to the business value of their technology investment.

The TDT / U-Solutions Partnership

Given the complexities of today's competitive business environment, coupled with the economic realities of doing more with less, businesses must maximize current investments while exploiting emerging technologies. This is now achievable at a fraction of the cost of traditional, proprietary licensed software by utilizing U-Solutions' take AIM (Architect, Implement and Manage) approach. This approach provides the Enterprise with an avenue to transform their infrastructure and business model into a nimble, service oriented enterprise, which enables future innovation through continuous process improvements.
